You are about to purchase a product that is not simple and may be difficult to understand

WHAT IS THIS PRODUCT?

Type: The investment basket, which is an investment product specified by the insurance company, to whose value development the value of the insurance can be tied. The investment basket cannot be acquired separately; it is part of unit-linked insurance.

Term: The recommended investment period is at least 3 years. This product does not have a maturity date, it is a continuous investment basket. The insurance company has a unilateral right to cancel the investment basket without a specific reason by informing the customer of the cancellation within a reasonable amount of time.

Objectives: A combined strategy of investing in stocks and bonds, including their equivalent financial instruments, with the aim of outperforming fixed-income investment returns with a higher risk than the fixed income markets. This is achieved through the active portfolio management using a variety of investment objects such as collective investment undertakings, stocks, debt securities, derivatives or alternative investments. The strategic weight for

asset classes other than debt securities is around 50%, but the share of these investments can vary between 30% and 70% of the assets depending on market conditions and other circumstances. This means that the proportions of fixed income, equities and alternative investments can vary significantly between periods. Proportion of alternative investments may represent up to 30% of the assets. Derivatives can be used to hedge against currency exchange rate change risk.

Intended retail investor: The investments basket suits investors who seek a higher return than those for fixed income investments in the long term and accept the risk of losing capital and returns.

WHAT ARE THE RISKS AND WHAT COULD I GET IN RETURN?

The risk indicator gives a picture of how this product's risk level relates to the risk level of other products.

The risk indicator assumes you keep the product for not less than 3 years. The actual risk can vary significantly if you cash in at an early stage and you may get back less.

According to PRIIPS regulation, this product's risk level is 3 out of 7, which is a medium-low risk class.

The investment basket does not have capital protection. The value of investment objects may increase or decrease. The investment basket has a high return risk and capital risk.

Return risk and capital risk mean that investors may lose the capital that they have invested as well as the returns in part or in full.

The risk-reward profile and risk category of the investment basket are subject to change. It is not possible to predict the future development of the basket's risk and reward profile and risk category based on the historical data of the investment basket's risk category. Not even the lowest risk category (1) means that the investment is completely risk-free.

This product does not include any protection from future market performance so you could lose some or all of your investment.

The scenarios shown illustrate how your investment could perform. You can compare them with the scenarios of other products. The scenarios presented are an estimate of future performance based on evidence from the past, and are not an exact indicator. What you get will vary depending on how the market performs and how long you keep the investment/product. The stress scenario shows what you might get back in extreme market circumstances, and it does not take into account the situation where we are not able to pay you. The figures shown include all the costs of the product itself, and includes the costs of your advisor or distributor. The figures do not take into account your personal tax situation, which may also affect how much you get back.

WHAT HAPPENS IF SB DRAUDIMAS IS UNABLE TO PAY OUT?

The product is not covered by the Investors' Compensation Fund or the Deposit Guarantee Fund. The investor may lose all or part of return and the capital he or she has invested in the investment basket. If the insurance company is placed in liquidation or bankruptcy, the interests of the policyholders are secured such that all insurance receivables, regardless of the insurance class and line, hold first preference to all of the company's assets during the company's liquidation and bankruptcy above all other receivables targeted at the company.

WHAT ARE THE COSTS?

Costs over Time

The tables show the amounts that are taken from your investment to cover different types of costs. These amounts depend on how much you invest, how long you hold the product. The amounts shown here are illustrations based on an example investment amount and different possible investment periods.

We have assumed:

- In the first year you would get back the amount that you invested (0% annual return). For the other holding periods we have assumed the product performs as shown in the moderate scenario
- EUR 10 000 is invested

	IF YOU SURRENDER AFTER 1 YEAR	IF YOU SURRENDER AFTER 2 YEARS	IF YOU SURRENDER AFTER 3 YEARS
Total cost	129.00 EUR	270.62 EUR	425.79 EUR

Annual cost impact (*)	1.29%	1.29% each year	1.29% each year
-------------------------------	-------	-----------------	-----------------

*This illustrates how costs reduce your return each year over the holding period. For example it shows that if you exit at the recommended holding period your average return per year for underlying investment with highest costs is projected to be 5.54 % before costs and 4.25 % after costs.

Composition of Costs

ONE-OFF COSTS UPON ENTRY OR EXIT		IF YOU SURRENDER AFTER 1 YEAR
Entry costs	The impact of the costs you pay when entering your investment	0.00 EUR
Exit costs	The impact of the costs of exiting your investment when it matures	0.00 EUR
ONGOING COSTS		IF YOU SURRENDER AFTER 1 YEAR
Management fees and other administrative or operating costs	1.26% of the value of your investment per year. This is an estimate based on management related cost over the last year	126.00 EUR
Transaction costs	0.03% of the value of your investment per year. This is an estimate of the costs incurred when we buy and sell the underlying investments for the product. The actual amount will vary depending on how much we buy and sell	3.00 EUR
INCIDENTAL COSTS TAKEN UNDER SPECIFIC CONDITIONS		IF YOU SURRENDER AFTER 1 YEAR
Performance fees	There is no performance fee for this product	0.00 EUR

Specification of Ongoing costs: investment basket's fee 1.10% is included in Management fees and other administrative or operating costs.

HOW LONG SHOULD I HOLD IT AND CAN I TAKE MONEY OUT EARLY?

Recommended minimum holding period: not less than 3 years

The investor can relinquish their investment at a value calculated for the investment basket on each banking day. This will not result in additional costs for the customer. In order to achieve the targeted return, the product needs to be kept for the recommended minimum investment period, i.e. not less than 3 years.
